

Horse Paddock

Palatable and Dense Horse Mixture

A very palatable & dense hardwearing mixture with high Timothy content supporting grazing and hay. The inclusion of fescue and meadow grass help to bind the sward together and quickly repair sod damage caused by hooves. The mixture produces a dense and persistent sward tolerating tight grazing.

Multi-Species Mix

Most Suitable for Grazing

Our multi-species mixture is made up of two or more species. Perennial Ryegrass and Timothy make up the backbone of these mixtures along with Red and White Clover (legumes) and Chicory and Plantain (herbs). Performance from multi species mixtures is achieved due to the complementary characteristics of these different plant types such as leaf and root architecture. The deep rooting species, Chicory and Plantain allow nutrients to be taken up from a different part of the soil profile than is the case with shallower rooting ryegrasses.

It is most suited for grazing only and the high clover content helps reduce Chemical Nitrogen usage.
