

Grass Seed

The Drummonds grass seed mixture range stands out for its exceptional quality and proven performance. These mixtures are derived from carefully chosen varieties, ensuring optimal performance for reseeded swards. Drummonds only includes varieties from the Irish recommended list to create balanced mixtures tailored for specific needs. Bespoke blends can be prepared upon request.

Our agronomy team provides personalised guidance on selecting the ideal grass seed mixture tailored to your farm's specific needs and soil type. Beyond initial recommendations, we offer comprehensive follow-up support, including management advice and practical tips to enhance the performance of your reseeded sward, ensuring you achieve the best possible results.

Super Grow

General Purpose/Permanent Pasture Mixture

Super Grow is a long-standing tried and trusted mixture from the Green Acres stable. A highly digestible and palatable blend of premium varieties which produces a sward suitable for cutting and/or grazing. Delivers an easy to manage sward.

Key Points

- ✓ A blend of both Intermediate and late heading varieties.
- ✓ Suitable for both grazing and silage.
- ✓ Excellent digestibility and spring growth.
- ✓ Early grazing the close up for silage.

45% Tetraploid

N.B. average heading date – 3rd June

Heavy Ground

Difficult Soils Mixture

A blend of perennial ryegrasses, timothy and white clover carefully selected for their ability to perform and persist under difficult soil conditions. Sward density and Winter hardiness are key features of this mixture.

Key Points

- ✓ An all-diploid mixture of varieties with excellent ground cover scores.
- ✓ Contains Timothy which gives a tightly grown sod to reduce poaching.
- ✓ Suitable for grazing and cutting.

Sweet Bite

Intensive Grazing Mixture

Our Premium Grazing Mixture.

- Contains ALL Late 4 & 5 Star Grazing varieties
- Excellent digestibility and graze out scores
- Will give superb Early Spring growth
- Excellent scores for Silage yield
- Available with or without clover
- Proven among dairy farmers

Key Points

| | |
|---|--|
| ✓ | Premium Grazing Mixture for Irish Farms. |
| ✓ | An all-late heading mixture with 5* Grazing varieties. |
| ✓ | Excellent digestibility. |
| ✓ | Superior Spring growth. |
| ✓ | Excellent ground cover ensuring sward longevity. |
| ✓ | Packs of 11.8 kgs with 0.6 kgs white clover. |

Gold Bite

Dual Purpose Mixture

Our Dual Purpose Grazing and Silage Mixture.

- Early Spring growth for early bite followed by Silage cut late May
- Excellent digestibility
- Contains 4 & 5 Star Grazing varieties
- Excellent Silage Yields
- Excellent ground cover & persistency

Key Points

- ✓ Superior Quality Mixture suitable for both Grazing and Silage.
- ✓ An all-late heading mixture with excellent silage yields.
- ✓ First Cut Silage ready to harvest 20th May to June 4th.
- ✓ Excellent spring and total yields.

Mega Bite

Intensive Silage Mixture

A dedicated intensive silage mixture designed to produce multiple high yielding, quality silage cuts consistently year after year. Contains all intermediate/mid-season heading grasses. Available with and without clover.

Key Points

- ✓ An all-intermediate heading date mixture.
- ✓ Tight Heading date range ensures excellent grass quality at harvest.
- ✓ Exceptional two cut silage mixture.
- ✓ Available with / without clover.

50% Tetraploid

N.B. average heading date – 27th May

N.B. DMD (Dry Matter Digestibility) will fall by a 1/2 unit per day where seed heads emerge. Always aim to cut 5-10 days before average heading date to optimise the quality of your silage.

Red Clover Silage

Medium term cutting mixture with Red Clover

- Highly productive silage mixture
- Highest PPI Variety Aberspey with superb silage yield, quality
- High red clover content gives high protein forage
- Also with white clover to give excellent clover content in the sward
- Qualifies for DAFM Scheme €300/Ha

N.B. average heading date – 26th May

N.B. Will deliver 2 or 3 cuts of high protein, bulky silage by mid-July with scope for further cuts or aftermath grazing.

Key Points

- ✓ An intensive silage mixture.
- ✓ Designed for frequent cutting and will last 3 to 4 years.
- ✓ Red clover produces high protein forage.
- ✓ Compliant to BISS Red Clover scheme.
- ✓ Important not to over graze or mow too tight as red clover prone to plant loss.

Horse Paddock

Palatable and Dense Horse Mixture

A very palatable and dense hardwearing mixture with high Timothy content supporting grazing and hay. The inclusion of fescue and meadow grass help to bind the sward together and quickly repair sod damage caused by hooves. The mixture produces a dense and persistent sward tolerating tight grazing.

Multi-Species Mix

Most Suitable for Grazing

Our multi-species mixture is made up of two or more species. Perennial Ryegrass and Timothy make up the backbone of these mixtures along with Red and White Clover (legumes) and Chicory and Plantain (herbs). Performance from multi species mixtures is achieved due to the complementary characteristics of these different plant types such as leaf and root architecture. The deep rooting species, Chicory and Plantain allow nutrients to be taken up from a different part of the soil profile than is the case with shallower rooting ryegrasses.

It is most suited for grazing only and the high clover content helps reduce Chemical Nitrogen usage.
